# UMDNS

Why UMDNS:

- International Standard of Medical Device Nomenclature
- Nomenclature Group discussions took place
- Pilot Project was carried out
- Nomenclature Group approval

- 
- Cleansing of Acute Database for 3 x Midland Hospitals, consisting of reviewing over 12,000 assets to develop National AIMS Nomenclature/UDMNS list
  - On completion of cleansing, list was issued to Beaumont for comparison purposes
  - Only 9 equipment type discrepancies found

## Method of agreeing discrepancies:

- Discrepancies sent to Nomenclature Sub-Committee for a vote – see Equipment Type Vote below
- Going forward, this method will be adopted to decide on any discrepancies
