

Clinical Integration –

As Smart as You

Our Clinical Integration Services ...

- ... mean scalability, openness and modularity.
- ... allow maximum flexibility in interpreting your clinical results.
- ... build the platform for your holistic clinical research concept.
- ... support HL7, DICOM, GDT and many more.
- ... improve the efficiency of your daily routines the smart way.

CareFusion

We are there for you all the way

Interpretation

Sentry Web Smart Interp

Enter the next level of clinical cooperation. Build on Sentry Web's ultimate workflow capabilities for quality, physician and peer review.

Sentry.NET

Easily access your clinical PFT records over the web to Review and interpret results from any location of your choosing.

Clinical Research

Turn your data into meaningful conclusions – use your preferred statistical tool for further analysis.

PRIMARY CARE

SECONDARY/TERTIARY CARE

Patient goes to doctor

Patient goes to hospital

Patient goes home

Worklist

Manage your daily routines using our smart planning tools.

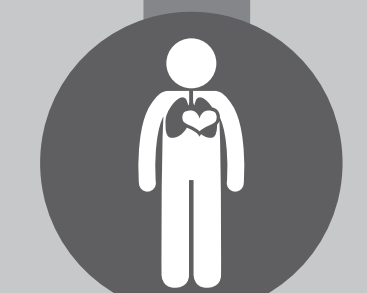

Interoperability

Use your preferred protocol. Our solution supports everything – from HL7 and DICOM to customized web services.

SentryConnect

Integrates your PFT lab accurately into your local ICT environment. Extend your overall clinical workflow into the SentrySuite world.

Clinical Integration Services –

We realize what you need

At CareFusion we take time to listen and to understand your exact needs. As a result we can provide a custom-made service containing a detailed project design with exact time and cost estimations. Each package is bespoke and tailored specifically to you. Your clinical integration project will include the following elements:

1 Analyzing – We listen to you.

Together we identify your needs regarding your workflow, reporting and data flow. We develop a dedicated plan for enhancing your lab to the SentrySuite world.

2 Planning – Designing your customized solution.

Once your preferred workflow is defined we combine our solutions and create your unique setup. Your tailored package includes dedicated work flow diagrams and data flow diagrams as well as logical and physical network plans.

3 Realization – Comprehensive Service Integration.

Our solution fits your needs – we will install all required elements via remote support or on-site if required.

4 Training – Gain User Acceptance.

Once your needs are fulfilled we will arrange training for clinical and technical staff to ensure they fully benefit from the new improved workflow – training is the key.

We listen to you and consult with you to find your Clinical Integration solution.
